

Maintaining Harmony

Understanding,
Cooperating, Supporting
Your People

Appreciating the gains
from the system

Supporting others and
showing concern

Directly addressing
people, rather than
complaining behind
their backs

Moving past differences
without any hard
feelings

ACTING WITH Integrity

Thinking in terms of **What Can I Give?**
not just **What Can I Get?**

Safeguarding

Protecting and
Strengthening
Your System

Being responsible and
upholding the image of
the system in each action

Being part of the solution,
by addressing the observed
problems in the system,
rather than ignoring or just
complaining about them

**Ensuring everyone's
alignment** to the decided
values and principles

**Standing strong by your
system** in times when the
system faces difficult
situations

*A system could be my family, school, workplace, country, or so on.
Before supporting it, evaluate whether what I'm part of is aligned with proper values and attitudes.
Keep in mind that safeguarding my system doesn't mean looking down upon others.
