

Passion to Grow

You

1. Giving importance to your growth
2. Introspecting and continuously making yourself better as a human being

Your Personal Relationships

1. Understanding what can be done to increase the depth of a relationship
2. Understanding how you can contribute to each other's growth
3. Understanding how you can create something good together

Your Career

1. Always having a goal and working towards it
2. Challenging yourself and taking up new challenges
3. Maintaining contemporary knowledge
4. Constant upskilling

Instruction

Be open-minded when you are implementing any action item. Have a combination of action items which help you understand the true potential of a person like understanding about neuroplasticity, observing others and action items that help you tap into your potential

Examples for action items that we can take up in Passion to Grow

- ✓ Think of the people that you have seen in your life who have grown to greater heights either in career, knowledge, earning money, etc. Try to identify one good quality in them that contributed to their growth.
- ✓ Research on neuroplasticity and try to understand how it worked in your life till now.
Also, think about the applications it has in your life further.
- ✓ Think of the things you felt that you can't do since your childhood. Start doing them. It is ok whatever the result is, but try doing it with full willingness.
- ✓ Learn
 1. New things in your field
 2. Something from everyone around you
- ✓ List down the resistances that are stopping you from growing. Take up each one, find a solution, apply it and move forward in your life.
- ✓ Identify people who are on a growth pedal, observe them, have conversations with them on how they think about challenges, obstacles etc. and what they do to overcome them. Try to surround yourself with such type of people.

- ✓ Get clarity on where you want to see yourself as a professional/learner in the next stage. Write down your strengths and weaknesses. See how you can make use of your strengths or what else you can develop within you to advance in your life.
- ✓ Write down the qualities within you that are causing problems in your relationships or that are not letting you be completely happy. Set a goal and make them better slowly.
- ✓ Challenge yourself - In whatever you do, be it a routine/new thing, think of something that challenges you and helps you to stretch yourself to perform better. Reward yourself when you achieve the challenge.
- ✓ Proactively appreciate whenever someone does/performs something well. Take them as a source of inspiration.

Example for implementation of an action item

Action Item

Learn

- a) New things in your field
- b) Something from everyone around you

Measurable : At least one new thing

Time period : Every week for 3 months i.e., till DD/MM/YY
